DETAILED ACTION

Response to Amendment

1. Applicant's amendment of claims 1, 57, 246, 247 is acknowledged and has been entered.
2. Claims 1, 40, 49, 50, 52, 57, 97, 106-107, 109, 246, and 247 are currently pending and under examination.
3. Claims 111, 112, 145, 146, 177-180, 182-183, 215, 216 are withdrawn.
4. Applicant's amendment of claims 1, 57, 246, 247 has necessitated the following election of species requirement. This is made in addition to the restriction requirement mailed January 14, 2008.

Election/Restrictions

This application contains claims directed to the following patentably distinct species: applying heat, using a solution having a high ionic strength, a combination of applying heat and using a solution having a high ionic strength, using a solution containing an enzyme, and applying a magnetic field. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record. More specifically, these different species would only be effective in breaking the attractive force or bonds between different sets of molecules, and the techniques that would be successful for a given set of molecules would not be successful for a different set of molecules, and would further require a search on the different types of bonds or attractive forces that would be capable of being broken upon application of each of the different species. Furthermore, these species were not previously

Art Unit: 1641

recited in the claims. Therefore, searching for the different recited species would pose an undue burden on the Office.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the broad genus of “breaking the attractive force or bonds”, drawn to claims 1, 58, is generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to

Art Unit: 1641

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson Yang whose telephone number is (571)272-0826. The examiner can normally be reached on 8:30-5:00.
